

ORIGINAL

REVISED NEWMAN PROPOSED AMENDMENT NO. 1

TIME/DATE PREPARED: October 11, 2011

COMPANY: Tucson Electric Power Company

AGENDA ITEM NO. 21

DOCKET NO(S). E-01933A-10-0266

OPEN MEETING DATE: October 11-12, 2011

Page 5, line 10, INSERT New Finding of Fact: "The Commission disagrees with Staff's recommendation regarding the incentive level. We believe that a differentiation between the incentive levels for non-leased and leased residential and commercial DG UFI's is warranted in this case. In addition, we believe that \$700,000 should remain as commercial Distributed Generation PBI (Production Based Incentives). Thus, for the \$564,500 in funds remaining through the end of 2011 we will set the UFI for non-leased residential and commercial DG systems at \$1.45 per watt and the incentive for leased residential and commercial DG systems at \$1.00 per watt."

Page 5, lines 26-28, DELETE Ordering Paragraph.

Page 5, line 26, INSERT New Ordering Paragraph: "IT IS FURTHER ORDERED that Tucson Electric Power shall allow \$700,000 to remain in commercial DG PBIs, and make available the remaining \$564,500 for UFI's to fund additional residential and commercial DG at incentive levels of \$1.45 per watt for non-leased residential and commercial DG systems and \$1.00 per watt for leased residential and commercial DG systems, through the end of 2011."
